

Morgan Khan

Senior Mobile Developer

Cape Town, ZA | morgan.khan@gmail.com | +1 (602) 759-7000 | github.com/morgankhan | linkedin.com/in/morgan-khan

PROFESSIONAL SUMMARY

Senior Mobile Developer with 7+ years building production software across the mobile stack. Comfortable owning features end to end, mentoring peers, and partnering with product to ship measurable outcomes. Strong on testing, code review, and pragmatic system design.

PROFESSIONAL EXPERIENCE

Senior Mobile Developer

2023 - Present

Tessera Tech - Toronto, ON

- Implemented the push-notification pipeline, increasing throughput 19%.
- Scaled the CI/CD release pipeline via Fastlane, reducing cloud spend 38%.
- Architected in-app purchases and subscriptions.
- Owned an image-caching layer cutting load time 46%.
- Refactored a biometric login flow, increasing throughput 51%.
- Implemented a cross-platform app with 39k installs.

Mobile Developer

2022 - 2023

Meridian Software - Warsaw, PL

- Shipped a biometric login flow.
- Designed an image-caching layer cutting load time 48%, reducing cloud spend 34%.
- Automated the push-notification pipeline, raising test coverage to 72%.
- Implemented the analytics + crash reporting stack, reducing cloud spend 32%.
- Refactored the CI/CD release pipeline via Fastlane, increasing throughput 62%.

Software Engineer

2021 - 2022

Quanta Works - Bengaluru, IN

- Shipped a biometric login flow, shrinking bundle size 24%.
- Delivered the push-notification pipeline, eliminating 71 on-call pages/week.
- Implemented the offline-first sync engine, supporting 45k daily active users.
- Automated in-app purchases and subscriptions, cutting p95 latency 62%.
- Shipped the CI/CD release pipeline via Fastlane, eliminating 54 on-call pages/week.

Junior Full Stack Engineer

2018 - 2021

Delphi Networks - Manila, PH

- Automated a cross-platform app with 10k installs, improving CI time by 20%.
- Designed a biometric login flow, reducing cloud spend 57%.
- Architected the offline-first sync engine.
- Migrated an image-caching layer cutting load time 36%, improving CI time by 21%.
- Implemented in-app purchases and subscriptions, raising test coverage to 83%.
- Owned the push-notification pipeline, improving CI time by 40%.
- Owned the CI/CD release pipeline via Fastlane, supporting 24k daily active users.

CERTIFICATIONS

- Scrum Alliance CSD
- Certified Kubernetes Application Developer (CKAD)

LANGUAGES

German (professional), Japanese (professional), Spanish (fluent)

TECHNICAL SKILLS

Languages: Java, TypeScript, Kotlin, Dart, Swift

Frameworks: React Native, SwiftUI, Flutter, Jetpack Compose

Databases: Firebase, SQLite, Realm

EDUCATION

Degree	Institution	Year
B.Sc. Computer Engineering	National University	2017

SELECTED PROJECTS

Vertex - Delivered the offline-first sync engine, improving CI time by 64%. - Delivered the analytics + crash reporting stack.	<i>Client work</i>
VertexKit - Built the analytics + crash reporting stack, eliminating 85 on-call pages/week. - Delivered a biometric login flow, increasing throughput 28%.	<i>Client work</i>
Pulse App - Reduced in-app purchases and subscriptions, shrinking bundle size 23%. - Automated in-app purchases and subscriptions. - Architected an image-caching layer cutting load time 51%, improving CI time by 60%.	<i>Client work</i>
