

Jordan Mensah

Senior Software Engineer

Barcelona, ES | jordan.mensah@proton.me | +1 (778) 760-3776 | github.com/jordanmensah | linkedin.com/in/jordan-mensah

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years building production software across the backend stack. Comfortable owning features end to end, mentoring peers, and partnering with product to ship measurable outcomes. Strong on testing, code review, and pragmatic system design.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

2024 - Present

Foundry42 - Bengaluru, IN

- Built the reporting data warehouse ETL, supporting 19k daily active users.
- Automated the billing REST API, cutting p95 latency 19%.
- Optimized a background job system on Redis queues.
- Automated the notification delivery service, improving CI time by 18%.
- Built the authentication + RBAC layer.

Senior Full Stack Developer

2022 - 2024

Pinecrest Solutions - Berlin, DE

- Led the reporting data warehouse ETL, shrinking bundle size 18%.
- Scaled the authentication + RBAC layer, raising test coverage to 93%.
- Owned a background job system on Redis queues, shrinking bundle size 33%.
- Architected the billing REST API.
- Architected a payments microservice handling 52k requests/min, eliminating 39 on-call pages/week.
- Migrated a GraphQL gateway over 21 services.

Software Engineer

2020 - 2022

Zephyr Software - Sydney, AU

- Architected the billing REST API.
- Reduced the reporting data warehouse ETL, supporting 23k daily active users.
- Architected the authentication + RBAC layer, eliminating 44 on-call pages/week.
- Designed an event-driven ingestion pipeline, reducing cloud spend 37%.
- Designed a background job system on Redis queues, shrinking bundle size 58%.

Frontend Developer

2019 - 2020

Tessera Tech - Sydney, AU

- Owned the reporting data warehouse ETL, eliminating 72 on-call pages/week.
- Refactored the billing REST API, supporting 45k daily active users.
- Refactored an event-driven ingestion pipeline, shrinking bundle size 59%.
- Reduced a GraphQL gateway over 36 services, increasing throughput 17%.
- Built the notification delivery service, supporting 24k daily active users.
- Reduced a payments microservice handling 55k requests/min, increasing throughput 35%.

Junior Frontend Developer

2018 - 2019

Brightwave - Bengaluru, IN

- Shipped the notification delivery service.
- Led an event-driven ingestion pipeline, raising test coverage to 73%.
- Automated the authentication + RBAC layer, reducing cloud spend 27%.
- Built a background job system on Redis queues, shrinking bundle size 20%.
- Refactored the reporting data warehouse ETL.
- Scaled the billing REST API.
- Migrated a GraphQL gateway over 36 services, cutting p95 latency 36%.

LANGUAGES

Mandarin (native), German (professional)

EDUCATION

Degree	Institution	Year
B.Sc. Computer Science	Riverside Institute of Technology	2017

TECHNICAL SKILLS

Languages: Ruby, Python, TypeScript, Java, Go
Frameworks: Django, Express, FastAPI, Rails, .NET, Spring Boot
Databases: MySQL, Redis, PostgreSQL, MongoDB, DynamoDB
Cloud & DevOps: Terraform, Docker, Kubernetes

CERTIFICATIONS

- Certified Kubernetes Application Developer (CKAD)
- AWS Certified Developer - Associate
- HashiCorp Terraform Associate

SELECTED PROJECTS

Ledgerly App • Owned a background job system on Redis queues. • Owned a payments microservice handling 40k requests/min, raising test coverage to 83%. • Designed a payments microservice handling 72k requests/min.	<i>Client work</i>
Forge • Shipped the reporting data warehouse ETL. • Optimized the authentication + RBAC layer, supporting 40k daily active users. • Shipped a payments microservice handling 61k requests/min.	<i>Client work</i>
BeaconKit • Owned an event-driven ingestion pipeline, eliminating 48 on-call pages/week. • Migrated a GraphQL gateway over 37 services. • Delivered the reporting data warehouse ETL, raising test coverage to 76%.	<i>Side project</i>
Nimbus CLI • Scaled a GraphQL gateway over 17 services, improving CI time by 31%. • Built an event-driven ingestion pipeline, increasing throughput 46%.	<i>Side project</i>
