

Priya Larsen

Senior Software Engineer

Manila, PH | priya.larsen@proton.me | +1 (819) 746-7531 | github.com/priyalarsen | linkedin.com/in/priya-larsen

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years building production software across the backend stack. Comfortable owning features end to end, mentoring peers, and partnering with product to ship measurable outcomes. Strong on testing, code review, and pragmatic system design.

TECHNICAL SKILLS

Category	Technologies
Languages	TypeScript, C#, Go, Java, Python
Frameworks	Rails, Spring Boot, .NET, FastAPI
Databases	MySQL, PostgreSQL, MongoDB
Cloud & DevOps	AWS, GitHub Actions, Kubernetes, Terraform

PROFESSIONAL EXPERIENCE

Senior Software Engineer

2023 - Present

Nimbus Studios - Dublin, IE

- Scaled the billing REST API, cutting p95 latency 65%.
- Led the authentication + RBAC layer, eliminating 9 on-call pages/week.
- Optimized a payments microservice handling 30k requests/min.
- Built an event-driven ingestion pipeline, reducing cloud spend 62%.
- Scaled the notification delivery service, improving CI time by 19%.

Frontend Developer

2022 - 2023

Quanta Works - Warsaw, PL

- Architected the notification delivery service, increasing throughput 50%.
- Refactored the billing REST API.
- Delivered a payments microservice handling 63k requests/min, cutting p95 latency 19%.
- Shipped a GraphQL gateway over 8 services.
- Automated a background job system on Redis queues, shrinking bundle size 36%.
- Architected an event-driven ingestion pipeline, improving CI time by 57%.
- Led the reporting data warehouse ETL, increasing throughput 64%.

Full Stack Developer

2021 - 2022

Riverpoint Tech - Amsterdam, NL

- Designed a background job system on Redis queues, cutting p95 latency 65%.
- Scaled the notification delivery service, reducing cloud spend 24%.
- Implemented an event-driven ingestion pipeline.
- Shipped a GraphQL gateway over 36 services, reducing cloud spend 65%.
- Migrated the authentication + RBAC layer, shrinking bundle size 42%.

Senior Frontend Developer

2018 - 2021

Skylark Interactive - Amsterdam, NL

- Automated an event-driven ingestion pipeline.
- Architected the notification delivery service, shrinking bundle size 26%.
- Implemented the authentication + RBAC layer, increasing throughput 45%.
- Scaled a GraphQL gateway over 6 services, eliminating 57 on-call pages/week.
- Automated the billing REST API.
- Scaled a background job system on Redis queues, supporting 7k daily active users.
- Optimized the reporting data warehouse ETL, raising test coverage to 85%.

Junior Frontend Developer

2017 - 2018

Tessera Tech - Denver, CO

- Automated the authentication + RBAC layer, increasing throughput 56%.
- Refactored a GraphQL gateway over 32 services, shrinking bundle size 54%.
- Designed an event-driven ingestion pipeline.
- Migrated a payments microservice handling 61k requests/min.
- Implemented the billing REST API.
- Automated the notification delivery service, supporting 37k daily active users.

EDUCATION

Degree	Institution	Year
B.Sc. Information Systems	College of Engineering	2017

LANGUAGES

English (native), Mandarin (native), Spanish (fluent)

CERTIFICATIONS

- Google Associate Cloud Engineer
- MongoDB Certified Developer

SELECTED PROJECTS

Forge

Client work

- Implemented an event-driven ingestion pipeline, shrinking bundle size 45%.
- Migrated a payments microservice handling 65k requests/min.
- Led the billing REST API, supporting 87k daily active users.

Vertex App

Side project

- Delivered the reporting data warehouse ETL, increasing throughput 29%.
- Migrated the billing REST API, shrinking bundle size 25%.
- Scaled a payments microservice handling 24k requests/min.

Forge App

Side project

- Automated the billing REST API, increasing throughput 25%.
- Owned a payments microservice handling 44k requests/min.
