PROFESSIONAL SUMMARY

Lead Software Engineer with 13+ years building production software across the backend stack. Comfortable owning features end to end, mentoring peers, and partnering with product to ship measurable outcomes. Strong on testing, code review, and pragmatic system design.

PROFESSIONAL EXPERIENCE

Lead Software Engineer

2023 - Present

Helix Data - Amsterdam, NL

- Architected the authentication + RBAC layer, eliminating 33 on-call pages/week.
- Scaled the reporting data warehouse ETL, reducing cloud spend 24%.
- Scaled a payments microservice handling 15k requests/min, supporting 90k daily active users.
- Led the notification delivery service.
- Optimized an event-driven ingestion pipeline, supporting 77k daily active users.
- Shipped a background job system on Redis queues.
- Scaled a GraphQL gateway over 3 services.

Software Engineer

2020 - 2023

Arcadia Labs - Singapore

- Built a background job system on Redis queues, supporting 19k daily active users.
- Architected the reporting data warehouse ETL.
- Reduced the authentication + RBAC layer, reducing cloud spend 56%.
- Reduced an event-driven ingestion pipeline, reducing cloud spend 34%.
- Optimized a payments microservice handling 38k requests/min, raising test coverage to 82%.
- Automated the billing REST API.
- Shipped the notification delivery service.

Senior Backend Developer

2017 - 2020

Beacon Systems - Manchester, UK

- Implemented the notification delivery service, raising test coverage to 87%.
- Architected a background job system on Redis queues.
- Led a payments microservice handling 30k requests/min, cutting p95 latency 27%.
- Reduced the reporting data warehouse ETL, increasing throughput 30%.
- Reduced the authentication + RBAC layer, raising test coverage to 91%.
- Built the billing REST API, reducing cloud spend 55%.
- Optimized a GraphQL gateway over 23 services.

Software Engineer

2014 - 2017

Zephyr Software - Singapore

- Automated a payments microservice handling 52k requests/min, eliminating 60 on-call pages/week.
- Architected a GraphQL gateway over 9 services, eliminating 83 on-call pages/week.
- Designed the authentication + RBAC layer.
- Built the notification delivery service.
- Built the reporting data warehouse ETL.
- Led the billing REST API.

Junior Backend Developer

2012 - 2014

Pinecrest Solutions - Cape Town, ZA

- Shipped a payments microservice handling 38k requests/min.
- Owned an event-driven ingestion pipeline, reducing cloud spend 28%.
- Reduced the billing REST API, raising test coverage to 78%.
- Built the reporting data warehouse ETL, raising test coverage to 88%.
- Delivered a GraphQL gateway over 40 services, raising test coverage to 72%.

LANGUAGES

Arabic (native), Portuguese (fluent)

TECHNICAL SKILLS

Terraform, FastAPI, TypeScript, .NET, Docker, C#, PostgreSQL, MySQL, Java, Python, Go, Spring Boot, Redis, GitHub Actions

EDUCATION

Degree	Institution	Year
B.Eng. Software Engineering	Northgate Institute of Technology	2010

CERTIFICATIONS

- MongoDB Certified Developer
- HashiCorp Terraform Associate

SELECTED PROJECTS

Atlas API • Implemented a background job system on Redis queues, improving CI time by 50%. • Architected a background job system on Redis queues. • Implemented a payments microservice handling 34k requests/min.	<i>Side project</i>
Cascade CLI • Reduced a background job system on Redis queues. • Migrated a payments microservice handling 13k requests/min.	<i>Client work</i>
Vertex • Designed the reporting data warehouse ETL, cutting p95 latency 61%. • Owned the billing REST API, increasing throughput 51%. • Migrated an event-driven ingestion pipeline.	<i>Open source</i>
AtlasKit • Designed the billing REST API, supporting 13k daily active users. • Reduced the reporting data warehouse ETL, shrinking bundle size 28%. • Reduced a background job system on Redis queues, shrinking bundle size 37%.	<i>Open source</i>
