

Grace Reyes

Lead Backend Developer

Cape Town, ZA | grace.reyes@outlook.com | +1 (815) 600-9633
github.com/gracereyes | linkedin.com/in/grace-reyes

PROFESSIONAL SUMMARY

Lead Backend Developer with 9+ years building production software across the backend stack. Comfortable owning features end to end, mentoring peers, and partnering with product to ship measurable outcomes. Strong on testing, code review, and pragmatic system design.

TECHNICAL SKILLS

Category	Technologies
Languages	Go, Java, TypeScript, Ruby
Frameworks	Rails, Express, Django, FastAPI, .NET, Spring Boot
Databases	DynamoDB, Redis, MongoDB, MySQL, PostgreSQL
Cloud & DevOps	Docker, AWS, Kubernetes, Terraform, GitHub Actions

PROFESSIONAL EXPERIENCE

Lead Backend Developer

2022 - Present

Zephyr Software - Manchester, UK

- Reduced a payments microservice handling 49k requests/min, reducing cloud spend 54%.
- Designed an event-driven ingestion pipeline, raising test coverage to 89%.
- Migrated a GraphQL gateway over 38 services, reducing cloud spend 43%.
- Owned the reporting data warehouse ETL.
- Scaled a background job system on Redis queues, shrinking bundle size 58%.
- Optimized the notification delivery service.
- Scaled the authentication + RBAC layer, reducing cloud spend 20%.

Frontend Developer

2020 - 2022

Vantage Cloud - Bengaluru, IN

- Migrated a GraphQL gateway over 11 services, shrinking bundle size 25%.
- Automated a payments microservice handling 16k requests/min, raising test coverage to 77%.
- Implemented the authentication + RBAC layer, increasing throughput 55%.
- Refactored the notification delivery service.
- Delivered the reporting data warehouse ETL, increasing throughput 64%.
- Scaled the billing REST API, reducing cloud spend 33%.
- Designed an event-driven ingestion pipeline.

Software Engineer

2017 - 2020

Arcadia Labs - Singapore

- Delivered the billing REST API, cutting p95 latency 54%.
- Optimized a payments microservice handling 79k requests/min, raising test coverage to 76%.
- Automated a GraphQL gateway over 40 services, supporting 48k daily active users.
- Scaled an event-driven ingestion pipeline.
- Refactored the reporting data warehouse ETL.
- Refactored the notification delivery service.

Junior Full Stack Engineer

2016 - 2017

Meridian Software - Chicago, IL

- Refactored the reporting data warehouse ETL, increasing throughput 57%.
- Built a GraphQL gateway over 33 services, reducing cloud spend 46%.
- Automated the authentication + RBAC layer, shrinking bundle size 35%.
- Automated a background job system on Redis queues, supporting 61k daily active users.
- Shipped the notification delivery service, shrinking bundle size 63%.

EDUCATION

Degree	Institution	Year
B.Sc. Computer Engineering	Northgate College of Engineering	2016
B.Sc. Information Systems	Polytechnic University	2014

LANGUAGES

Portuguese (fluent), Mandarin (native), Spanish (fluent)

CERTIFICATIONS

- Certified Kubernetes Application Developer (CKAD)
- AWS Certified Developer - Associate
- HashiCorp Terraform Associate

SELECTED PROJECTS

HarborKit • Architected an event-driven ingestion pipeline, raising test coverage to 83%. • Architected the authentication + RBAC layer, eliminating 50 on-call pages/week.	<i>Side project</i>
Pulse App • Optimized the billing REST API. • Built the authentication + RBAC layer, raising test coverage to 84%.	<i>Client work</i>
Ledgerly CLI • Migrated a background job system on Redis queues, improving CI time by 16%. • Delivered a background job system on Redis queues.	<i>Client work</i>
Harbor CLI • Optimized the billing REST API. • Delivered an event-driven ingestion pipeline, eliminating 38 on-call pages/week.	<i>Open source</i>
